

PVC Tubing

Model number: SB-PVC

Working temperature: -30°C~+105°C

Structure

PVC tubing is produced by superior and environmentally friendly polyvinyl colloidal particle, after drying, extruded to tubing when heated up and liquated, then packing in rolls after cooling.

Usage

With the excellent flexibility, mechanical and dielectric capability, flame resistance performance, PVC tubing is widely used in outside insulation protection of outgoing wires of electrical appliances, transformers, electrical motors or lighting equipment, and electronic components, wire harness and etc.

Specification

| Item | Unit | Test Method | Numerical Value | |
|--------------------|--------------|-------------------|-----------------|--------|
| | | | SB-300 | SB-600 |
| Voltage rating | V | | 300 | 600 |
| Temperature rating | °C | UL224 | 105 | |
| Voltage resistance | Before aging | UL224 23°C | 2500V/60sec | |
| | After aging | UL224 136°C 168hr | 2500V/60sec | |
| Volume resistivity | Ωcm | UL224 | ≥1010 | |
| Tensile strength | Before aging | UL224 23°C | ≥10.4 | |
| | After aging | UL224 136°C 168hr | ≥7.3 | |
| Elongation | Before aging | UL224 23°C | ≥100% | |
| | After aging | UL224 136°C 168hr | ≥100% | |
| Flexibility | | UL224 136°C 168hr | No cracking | |
| Heat shock | | UL224 180°C 4hr | No cracking | |
| Cold bend | | UL224 30°C 1hr | No cracking | |
| Copper stability | | UL224 136°C 168hr | No corrosion | |
| Flame resistance | | UL224 | VW-1 | |

Special instruction: The PVC tubing supplied for the customers should be based upon the samples which confirmed by both sides, not restricted by the above performance index.

Dimension

| AWG No. | Inner Diameter(mm) | Wall Thickness (mm) | | Package size(m/r) |
